EXPERIENCE

Woodcore .   **Sep 2022 – Present**
Senior Frontend Developer   Lagos, NG
- Developed and deployed world-class landing page for the company rebrand, ushering in new customers through the new onboarding form directly on the website.
- Championed the codebase migration from Javascript to Typescript, which kickstarted an entire shift to a V2 of the core CBA console in which i led a team of 3 frontend developers to:
    - Reduced our code bloat by at least 40,000 lines by reducing redundancy and enforcing DRY guidelines.
    - Identified opportunities to reduce reliance on 3rd party libraries and championed the creation of in-house components, resulting in a 50% reduction in integration issues and a 20% decrease in software development time.
    - Achieved a 25% reduction in bug reports and a 40% decrease in code errors through the successful completion of the codebase migration project.

- Helped optimize network calls by collaborating with the backend team to optimize and streamline our APIs, which have helped to set up more than 300k loan accounts, making them 30% faster.
- Worked closely with the lead designer to improve look and feel of the admin console to make it feel more intuitive, increasing user efficiency.

Lendsqr   **Aug 2022 – Present**
Senior Software Developer   Lagos, NG
- Collaborated closely with cross-functional teams,including product managers, designers, and other developers, to define, prioritize and ship features and deliverables to 3k+ organizations and 1m+ users.
- Mentor and provide technical guidance to 3 junior developers, to ensure seamless onboarding and integration into the team.
- Pioneered the brown bag session with the Engineering manager to encourage knowledge sharing across engineers.
- Conduct code reviews,ensuring adherence to coding standards,performance ,and security best practices.

Lendsqr & Assurdly.   **Apr 2023 – Jul 2023**
Lead Frontend Developer   Lagos,, NG
- Spearheaded the development of a new Direct Debit management platform further improving financial security for lenders and lendees by digitizing the Direct Debit Mandate process.
- Built in a flexible encryption system that allowed users of the platform to increase security on both the frontend and backend.
- Added other security features such as inactivity timeouts, two factor authentication and granular permissioning of the application according to roles.

P2Vest & Digithome.   **Dec 2021 – Jan 2023**
Lead Frontend Developer   Lagos,, NG
- Led the build of their lending service platform from the ground up to help civil servants obtain loans more easily.
- Worked closely with the design and product team to optimize user experience and accessibility on the

application.

- Earned the opportunity to help build out their new E-Real Estate Management platform by being involved end-to-end from the backend to the frontend.
- Helped improve the search feature by adding filters which better served our growing customer base across all 36 Nigerian states.
